KITTINON SAENGKHAO

Bangkok, Thailand
M: +66 65 4203273 **E:** kittinon.work@gmail.com
Github: https://github.com/paracetalom

EDUCATION

Kasetsart University, Nakhon Pathom, Thailand **2023-Present**
- Bachelor of Science Program in Computer Science

PROJECTS

Chitralada Garden **June - October 2023**
- Designed a mobile website prototype about agricultural knowledge using Figma.
- Practiced **UI/UX design** and wireframing for web applications.

Tetris Game Development **June - October 2024**
- Built a mini project in university focused on game development using Java.
- Gained experience in **testing, debugging, and project documentation**.

Commodity Trading Database **June - October 2024**
- Built and integrated a **database system** to support commodity trading platforms.
- Gained experience in **database design, queries, and optimization**.

MaskDetection System **November - March 2025**
- Applied MATLAB to detect individuals who were not wearing masks.
- Gained experience in **data analysis, algorithm implementation**.

Fruit Web Application **June - October 2025**
- Developed an e-commerce website for fruit selling.
- Designed front-end using **HTML, CSS, JavaScript** and managed data with **SQL**.

Web Portfolio Using Blender **June - October 2025**
- Created a **3D interactive web portfolio** using **Blender** and integrated it into a web page.
- Applied 3D modeling, animation, and **WebGL / Three.js** concepts for a visually engaging online portfolio.

SmartBin Project **February 2026**
- Developed a web-based AI plastic bottle detector using **Deep Learning** (image classification) for plastic bottle detection and waste separation.

Data Science **December 2025 – March 2026**
- Analyzed League of Legends match data using **Jupyter Notebook** (exploratory data analysis) to identify gameplay patterns and factors linked to winning.

MISCELLANEOUS

Languages	Thai (Native), English (Intermediate)
Technical Skills	C, Java, JavaScript, HTML, CSS, SQL, Spring Boot, Python
Tools & Platforms	Figma, MATLAB, Postman, Blender, Jupyter Notebook, Git/GitHub
Interests	Computer Science, Software Development, AI & Data Science, Graphic Design, Continuous Learning
Independent Learning	Studied research papers on Computer Vision, Deep Learning, and anomaly detection through ScienceDirect.
